New Product

HAZARDOUS LOCATION STAINLESS STEEL MATERIAL MASTER® BULK BAG DISCHARGING SYSTEM

Unit features sanitary stainless steel construction with round or angled structural tubing for rapid cleaning. Heavy-duty Flo-Master™ “breaker bar” bulk bag massaging system promote discharge of non-free flowing materials. A powerful Flo-Lock® discharge spout closure system quickly halts material flow for partial bag discharge, while a Sure-Seal® spout clamping system seals the bag discharge spout for dust-tight operation. Unit includes a fully integrated discharge hopper with pneumatic vibrator. Equipment includes intrinsically safe, all pneumatic controls for hazardous location service.

Systems are custom designed for your specific application requirements. For more information, call (800) 836-7068.
