## NEW PRODUCT RELEASE

### SIDE LOAD HYDRAULIC LIFT & DUMP CONTAINER DUMPER

Unit safely discharges containers of free-flowing material into an existing process at 81" above floor level. A stainless steel sanitary design, provides a clean operation designed for operating within food processing environments. System utilizes a two-speed hydraulic system which provides excellent rotational control and extended equipment life.

Unit features a custom container and pallet retention system, automated controls, and three (3) sided safety light curtain guarding package for safe and efficient operation. MTS exclusive lifting assembly package provides low clearance container rotation.

Available with discharge heights up to 40', rotation to 180°, for any size drum or container. Units are custom designed for your application requirements.
