## NEW PRODUCT RELEASE

### SANITARY LIFT & DUMP CONTAINER DUMPER

Unit safely discharges containers of non-free flowing material into an existing process at 16 ft above floor level. The exclusive two-speed hydraulic system provides excellent rotational control and extended equipment life.

Unit features 316L-2B stainless steel product contact surfaces for superior product purity and heavy-duty tubular carbon steel construction. Carbon steel painted with Steel-It® epoxy, designed for use in Food and Beverage processing and is FDA/USDA approved for areas of direct and indirect dry food contact.

Available with discharge heights up to 40', rotation to 180°, for any size drum or container. Units are custom designed for your application requirements.
