## **New Product**

### **MATERIAL MASTER® V-KNIFE DISCHARGER WITH RIGID SCREW CONVEYOR AND SCALE SYSTEM**

Patented MATERIAL MASTER® BULK BAG DISCHARGING SYSTEM with bag piercing knives provide for the discharge of materials from bulk bags with or without an outlet spout. System utilizes a 2-ton chain hoist to lift the bulk bag into the carbon steel discharge hopper where a static two angle bag piercing knife assembly empties bulk bags for a complete and efficient discharge of materials. Hopper features a full perimeter dust plenum with dust take off stub for product dust control. System features a rigid screw conveyor to transfer materials into the customer's existing process. A stainless steel load cell package provides loss-in-weight weighing capabilities.

Units are custom designed to meet customer specific application needs. Visit [www.materialtransfer.com](http://www.materialtransfer.com) or call (800) 836-7068 for additional information.
