**New Product**

## **MATERIAL MASTER® BULK BAG DISCHARGER WITH INTEGRATED DUST COLLECTION SYSTEM**

Patented MATERIAL MASTER® BULK BAG DISCHARGING SYSTEM includes an integrated dust collection system. Integrated dust collection system features stainless steel product contact, 210 SF media, 900 cfm, PTFE polyester cartridges, 3 HP blower, and returns collected dust to the product stream.

MTS exclusive Flo-Master™ bulk bag massaging system promotes material flow, while a powerful Flo-Lock® discharge spout closure system halts material flow for partial bag discharging. The Seal-Master™ dust-tight bag spout access chamber includes a pneumatically actuated Sure-Seal™ spout clamping system for complete dust free discharging of materials.

Systems are custom designed for your specific application requirements. For more information, call (800) 836-7068.
