**NEW PRODUCT**

## CUSTOM MATERIAL MASTER® BULK BAG DISCHARGING SYSTEM

Patented system designed for discharging product into customers existing process. Unit features a pneumatic chain hoist and Spider-Lift™ bag lifting frame. Unit features the exclusive heavy-duty “breaker bar” Flo-Master™ bulk bag massaging system to promote material flow, and the Flo-Lock® gate for partial bag discharge. Unit includes the stainless-steel Seal-Master™ round bag spout access chamber with "gull-wing" doors and a custom discharge transition which includes an integral interlock switch for operator safety. System features the exclusive stainless steel Sure-Seal® pneumatic bag spout clamping system for dust-tight discharge.

System controls housed within NEMA 4X stainless steel enclosures. System includes pneumatic piping utilizing 304 stainless steel rigid air lines and stainless-steel pneumatic fittings.

Systems are custom designed for your specific application requirements. For more information, call (800) 836-7068.
