New Release

PORTABLE LIFT & SEAL™ DRUM DISCHARGING SYSTEM

Portable drum discharging system safely and efficiently empties drums of various dry materials into your process. A hydraulic Lift & Seal System™ docks drums to a gasketed pour cone for dust-tight and contaminant-free product discharge. Pour cone features 316-2b stainless steel construction and includes a 316 stainless steel discharge nozzle with seal for dust-tight product transfer. Pour cone also includes a fully mounted 8" air actuated roller slide gate for controlled discharge.

Portable design allows customers to implement this machine into your process when and where it is necessary. Loading skip includes a drum locating system to properly align drums to the pour cone. Units are custom designed for your application requirements. Call (800) 836-7068 for more information.
