BULK BAG CONDITIONER QUICKSHIP PROGRAM

The Material Master™ Bulk Bag Conditioner offers a compact design and robust construction, delivering 75,000 lbs. of force to break up the most agglomerated materials.

With the QuickShip Program, you can have this powerful solution delivered to your operations within 4 weeks of placing a purchase order, minimizing downtime and maximizing productivity.

CLASS II, DIVISION 2 RATED MODEL AVAILABLE!

STANDARD QUICKSHIP UNIT FEATURES:

Heavy-duty carbon steel construction.

Hydraulic lift platform with 4,000 pounds capacity and 48" of travel.

Powered rotary turntable with 48" square surface, hydraulic slewing ring drive, and rotary encoder.

Industrial hydraulic unit with dual 5 GPM capacity and all required valving (50% max duty cycle).

Twin carbon steel pivoting conditioning arms with hydraulic actuation.

Metal safety guard panels on three (3) sides of the unit.

Safety light curtain with guards on the load side.

Industrial PLC with 10" color touchscreen HMI available with Allen Bradley or Schneider PLC & HMI.

Painted Safety Blue using PPG Durethane.

ADDITIONAL STANDARD HIGHLIGHTS:

- Stainless steel turntable cover
- Bag top conditioning capability
- Pressure relieved maintenance state
- Hydraulic enclosure with sound deadening material
- Variable frequency drive for hydraulic unit motor (improves cycle time by 30%)

DRIVEN BY EXCELLENCE.
